

USER FLOW

EmailAuto Studio — how a marketer uses it

Sign in → fill a brief → review the prompts → generate copy → preview & QA → export or push to SendGrid.
Plus saved history and admin approval. Here's the click-by-click journey.

THE JOURNEY

End-to-end in one view

A signed-in, approved marketer moves left → right. Admin & History sit alongside.

Sign in & approval

WHAT YOU DO

- 1 Open the app → land on the **sign-in** screen (Crossian logo).
- 2 New user: **Sign up** with email + password.
- 3 Existing approved user: **Sign in** and go straight to the studio.

WHAT HAPPENS

- ✓ New signups start as **pending**
"awaiting admin approval" screen
- ✓ An admin approves you → full access
deactivated accounts are blocked
- ✓ Session persists; you return straight to the studio

```
// sign-in
email    [ you@crossian.com ]
password [ ..... ]
[ Sign in ]   No account? Sign up
```

Describe the campaign

Brief

Products

Prompts

Copy

Preview

Export

WHAT YOU DO

- 1 Pick the **brand** (BraGoddess / GentsLux / LuxFitting / SantaFare).
- 2 Set **send date** and the recipient name token.
- 3 Choose **tiers** (A–F lifecycle) and **product segments**.
- 4 Write the **offer** and an optional **Hook Contract**.

WHAT YOU GET

- ✓ The **variant matrix** is set
tiers × segments (e.g. A21, F8...)
- ✓ Brand voice, hero product & rules pre-loaded
- ✓ The Hook Contract becomes the single source of truth for all copy

Choose the products

Brief

Products

Prompts

Copy

Preview

Export

WHAT YOU DO

- 1 Pick the products to feature from the brand's catalog.
- 2 The **hero product is locked** into position 1.
- 3 Keep it to **≤ 6 products** (the proven sweet spot).

WHAT YOU GET

- ✓ A clean, on-brand product set
hero always leads the email
- ✓ Prices & slugs feed the copy + links automatically
- ✓ Guardrail warns if you exceed 6 products

Review the prompts before they're sent

Brief

Products

Prompts

Copy

Preview

Export

WHAT YOU DO

- 1 See the exact **system prompt** (brand + persona) and one **user prompt per tier**.
- 2 Edit any of them if you want — copy or reset per prompt.
- 3 Click **Generate** when you're happy.

WHAT YOU GET

- ✓ Full transparency — **what you see is what's sent**
- ✓ Fine control over tone/instructions per tier
- ✓ Confidence before spending an API call

Generate & refine the copy

Brief

Products

Prompts

Copy

Preview

Export

WHAT YOU DO

- 1 Hit **Generate** — one Claude call per tier produces every variant.
- 2 Switch between variants (A21, F8...) via tabs.
- 3 Inline-edit subject, preheader, body, CTA; **Regenerate** if needed.

WHAT YOU GET

- ✓ On-brand, persona-written copy per variant
named micro-story, single hook, on-brand voice
- ✓ Strict structure (subject ≤ chars, preheader, CTA)
- ✓ Everything editable before preview

Preview, add images & QA

Brief

Products

Prompts

Copy

Preview

Export

WHAT YOU DO

- 1 See the email **render live**; toggle mobile / desktop width.
- 2 Paste **SendGrid image URLs** per block (logo optional).
- 3 Read the **pre-flight panel** and fix any flags.

WHAT YOU GET

- ✓ WYSIWYG of the real email (sandboxed)
- ✓ Win-pattern QA: subject/preview length, single hook, hero-first, ≤6 products, on-brand accent, banned phrases
- ✓ Confidence it's send-ready

Ship it

Brief

Products

Prompts

Copy

Preview

Export

WHAT YOU DO

- 1 **Download** a variant's `.html` or all as a `.zip`.
- 2 **Save version** to your history.
- 3 ↗ **Design** or ↗ **Dynamic Template** to push into SendGrid.

WHAT YOU GET

- ✓ SendGrid-format HTML, named `Brand_Sun31May26_21`
- ✓ Dynamic Template runs the clean/QA pass → returns the `d-...` ID
- ✓ A human does the final send inside SendGrid

Reopen a saved campaign

WHAT YOU DO

- 1 Click  **History** in the top bar.
- 2 Browse your saved generations (name, variants, date).
- 3 **Open** to restore, or **Delete**.

WHAT YOU GET

- ✓ The whole campaign restored into the studio brief, all variants, images — back to Preview
- ✓ Re-export or re-sync without redoing the work
- ✓ Private to you (Row-Level Security)

Manage the team

WHAT YOU DO

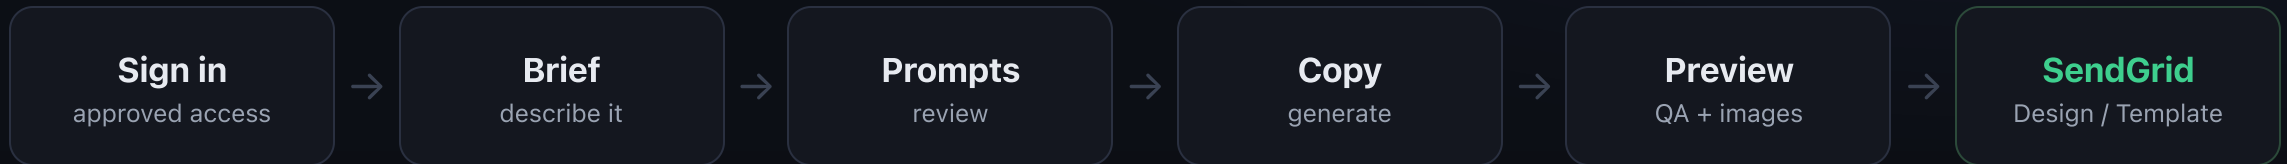

- 1 Click  **Admin** (visible to admins only).
- 2 **Approve** pending signups.
- 3 **Activate / deactivate** users or **reset** a password.

WHAT YOU GET

- ✓ Controlled access — only approved users get in
- ✓ Instant enable/disable of teammates
- ✓ Secure: admin actions run server-side, can't self-deactivate

RECAP

Brief → on-brand email → SendGrid, in minutes

No hand-built HTML, no copy-paste cleanup — a guided, governed flow with a human in control at the send step.
